

Refugees and COVID-19 (coronavirus)

Did you know that people with disabilities are being disproportionately affected by COVID-19?

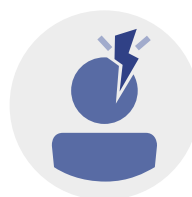

What are the challenges?

Hunger

A lack of health information and treatment

Depression and anxiety

Inability to adhere to social distancing

Increased risk of COVID-19 from living conditions

This World Refugee Day, we #StepWithRefugees by calling for the inclusion of persons with disabilities who are refugees or displaced in the global response to COVID-19.
